## 11 Abstract

### 12 AIM

13 To evaluate a novel grading system to predict lymph node metastasis (LNM) in  
14 patients with submucosal invasive colorectal carcinoma (SICRC).

### 16 METHODS

17 We analyzed the associations between LNM and various clinicopathological features  
18 in 252 patients with SICRC who had undergone radical surgery at the Seoul Saint  
19 Mary's hospital between 2000 and 2015.
