Manuscript Type: EDITORIAL

Are our endoscopy patients at risk for pyogenic liver abscess? (Invited Editorial Comment on Tsai MJ *et al.*: Recent upper gastrointestinal panendoscopy increases the risk of pyogenic liver abscess)

Herwig Cerwenka, Peter Schemmer

Abstract

This is an editorial comment on a recent publication reporting an increased rate of pyogenic liver abscesses (PLAs) after upper gastrointestinal panendoscopy. Its aim is to critically highlight the findings, limitations and potential clinical implications of this study. Issues of the mucosal barrier, the microbial flora,
