SIMILAR**Name of Journal:** *World Journal of Gastrointestinal Endoscopy***Manuscript NO:** 34999**Manuscript Type:** Letter to the Editor**Efficacy of Prucalopride in bowel cleansing before colonoscopy: Results of a pilot study****Vito Domenico Corleto, Giulio Antonelli, Chiara Coluccio, Lucia D'Alba, Emilio di Giulio****Abstract**

Colonoscopy is a crucial diagnostic instrument for colorectal cancer screening and an adequate bowel preparation is definitely decisive for the success of the procedure. Especially in elderly patients, bowel cleansing is considered a big issue, because it is often poorly tolerated for many reasons (like inability to swallow large volume of liquids or unlikable taste); this can cause a suboptimal preparation that may lead to miss a neoplastic lesion. There is relatively little data about how to improve preparation tolerability. The purpose of our pilot study was to analyze the effect of prucalopride (Resolor®), a highly selective serotonin 5HT₄ receptor agonist used for chronic constipation for its ability to
