## Re-Submission of Research Article

Göttingen, 22.08.2017

**Title:** "Reabsorption of iron into acutely damaged rat liver: a role for ferritins."

**Authors:** Ihtzaz Ahmed Malik, Jörg Wilting, Giuliano Ramadori and Naila Naz

**Dear Prof. Dr. Garcia-Olmo,**

Please find enclosed our revised manuscript entitled "Reabsorption of iron into acutely damaged rat liver: a role for ferritins" by Malik et al. We have modified the manuscript according the requirements of WJG, and polish language errors. Moreover, additional data is provided with the current version. We have also answered the editorial comments, which can be found at the end of this letter. We hope the manuscript is now suitable for further processing.

Thank you for your consideration in this matter.

Sincerely yours,

I. Malik

### Comments to Editor:

We are grateful that both of the reviewers fully agreed with our study, and no major criticism was raised. We carefully reviewed the manuscript and polished minor language errors.

The revised manuscript now also contains an audio file of the core tip, and additional comments at the end to enhance the clarity of the study.
