The following is an excerpt from the minutes of the Executive Subcommittee of the Mayo Institutional Review Board dated Tuesday, March 28, 2000:

Dr. L. A. Boardman

The Executive Subcommittee reviewed the protocol entitled "Biospecimen Resource for Research in Colorectal Cancer" from Drs. L. A. Boardman, D. Ahlquist, L. Burgart, G. Petersen, and Ms. H. Carlson with the understanding that the human studies aspects involve collection and storage of blood and colon tissue for future colorectal cancer research. Approval is contingent upon IRB approval of a written consent form for storage of the biological samples. This is referred to the Biospecimens Subcommittee for notation. The investigator is reminded that this study cannot be activated until the contingency is met. 622-00
