

## 新乡医学院第一附属医院医学科研伦理审批件

编号(Nº): 2015033

各位评审专家:

我院齐博同志申请的博士课题研究项目《miR-30a-3p/5p 表达失调促进食管鳞状细胞癌发生发展的作用及分子机制研究 (Down-regulation of miR-30a-3p/5p promotes esophageal squamous cell carcinoma cells proliferation by activating WNT signaling pathway)》经过医学伦理委员会的审核,认为该研究的设计和实施科学、可行,受试者的医疗和保护,受试者隐私的保护,知情同意的过程均符合医学伦理的要求,同意申报博士课题研究项目。如本项目有幸获批后,医院医学伦理委员会将进一步从研究方案、知情同意等方面加以规范,以保护受试者的利益。

Medical Ethics Approval of

The First Affiliated Hospital of XinXiang Medical University

The Evaluation Experts:

This Ph. D research project "Down-regulation of miR-30a-3p/5p promotes esophageal squamous cell carcinoma cells proliferation by activating WNT signaling pathway" that applied by Qi Bo, the associate chief physician of the First Affiliated Hospital of Xinxiang Medical University, has been reviewed by the Medical Ethics Committee. The design of project and the implementation of this Ph. D research project is considered scientific and feasible. The security protection of the subjects, the medical treatment of the subjects, the privacy protection and the process of informed consent of the subjects meet the requirements of Medical Ethics Committee. The Medical Ethics Committee agrees Qi Bo to apply his Ph. D research project. If this project will be approved, the Medical Ethics Committee will further standardize this research project's program, informed consent and other parts to protect the subject's interest.
