Midgut neuroendocrine tumor presenting with acute intestinal ischemia

Mantzoros I *et al.* Acute intestinal ischemia from neuroendocrine tumor

Ioannis Mantzoros, Natalia Antigoni Savvala, Orestis Ioannidis, Styliani Parpoudi, Lydia Loutzidou, Despoina Kyriakidou, Angeliki Cheva, Vasileios Intzos, Konstantinos Tsalis

Abstract

Neuroendocrine tumors represent a heterogeneous group of neoplasms that arise from neuroendocrine cells and secrete various peptides and bioamines. While gastrointestinal neuroendocrine tumors, commonly called carcinoids, account for about 2/3 of all neuroendocrine tumors, they are relatively rare.
