COMMENTS TO AUTHORS

I read with interest the paper entitled “Hepatic hydrothorax: an update and review of the literature” by Garbuzenko and Arefyev. The authors carried out a very exhaustive and up to date review on Hepatic hydrothorax. Although several reviews have been published in the last years, the present paper is well structured and references updated. The only suggestion to the authors is that it is better to depict an algorithmic therapeutic approach to hepatic hydrothorax.

COMMENTS TO AUTHORS

Dear Author, 1. Your manuscript is a review manuscript. I am not agree with the content of abstract. The abstract look like a research abstract (aim, method, result and conclusion). You must re-wrote as an abstract based on the type of article (review article) 2. Conclusion must be change to summary 3. There is statement about mechanism the Hepatitic Hydrothorax. It will be an informative thing if you add a diagram or picture mentioning it's mechanism. 4. There are many correction on the paragraphs writing Technic . please see the writing manuscript rule of the World Journal of Gastroenterology
