To whom it may concern

Re: The support of manuscript 36210 for the World Journal of Meta-Analysis

This letter confirms that the study presented in the manuscript "Different types of mechanical complications after surgical correction of adult spine deformity with osteotomy", #36210 for the World Journal of Meta-Analysis was performed according to the agreement between Medicrea and Orthopedic department of the University of Colorado Anschutz Medical Campus as a sponsored project. Medicrea concurs with manuscript #36210.

Also to be noted, the principal investigator (PI), Evalina L. Burger MD, has a consultancy agreement with Medicrea.

Sincerely,

Pierre Olivier, Chief Executive Officer
