COMMENTS TO AUTHORS

This is a case report of eosinophilic cholangitis treatment with budesonide. My comment is as follows. This patient has bilateral intrahepatic biliary stricture and jaundice. Please describe the indication of ERC and biliary biopsy to rule out malignancy for this disease. Why did you select the administration of budesonide at the first time in this case? Please describe it deeply and consider the dose and duration of budesonide in this disease.

COMMENTS TO AUTHORS

Eosinophilic cholangitis treatment with Budesonide In this case report, the authors have shared their treatment experience with budesonide in a patient with Eosinophilic Cholangitis. This case report may be important because it is the first, to treat Eosinophilic Cholangitis with budesonide. Only normal ranges of albumin, bilirubin, alkaline phosphatase, alanine aminotransferase and aspartate aminotransferase must be written in the text.

COMMENTS TO AUTHORS

The authors report here a case of eosinophilic cholangitis successfully treated with budesonide. This case is interesting and the manuscript is nicely written. However, I have minor suggestions to this manuscript. 1. Please add reference ranges to the biochemical results, as demonstrated in page 4 2. Please provide histopathological photograph with higher resolution to show eosinophil infiltrate
