Disabling portosystemic encephalopathy in a non-cirrhotic patient: Successful endovascular treatment of a giant inferior mesenteric-caval shunt *via* the left internal iliac vein

de Martinis L *et al.* Portosystemic shunt-related encephalopathy in non-cirrhotic patient

Luca de Martinis, Gloria Groppelli, Riccardo Corti, Lorenzo Paolo Moramarco, Pietro Quaretti, Pasquale De Cata, Mario Rotondi, Luca Chiovato

Abstract

Hepatic encephalopathy is suspected in non-cirrhotic cases of encephalopathy because the symptoms are accompanied by hyperammonaemia. Some cases have been misdiagnosed as psychiatric diseases and consequently patients hospitalized in psychiatric institutions or geriatric facilities. Therefore, the importance of accurate diagnosis of this disease should be strongly
