Updated review on immune factors ⁸ in the pathogenesis of Crohn's disease

Li N *et al.* Immune in the Pathogenesis of CD

Na Li, Rui-Hua Shi

Abstract

Although the incidence of Crohn's disease (CD) in China is not as high as in European and American countries, there has been a clear increasing trend in recent years. Little is known about its pathogenesis, cause of deferment and the range of complications associated with the disease. Local and international scholars have presented many hypotheses of CD pathogenesis based on experimental and clinical studies, including genetic susceptibility,
