COMMENTS TO AUTHORS

Thorough and comprehensive review about SEPT9 gene methylation. I would recommend your paper to be published in a screening and diagnostic journal which is more correlated to the scope of your review. Do not repeat the data mentioned in the table in the text because this would be redundant please make use of language editing service as this would highly improve your paper readability and professionalism.

Answer:

Dear Reviewer,

Thank you for your positive and constructive suggestions. We have studied your comments carefully and have made correction which we hope meet with approval.

1 We have submitted our paper to World Journal of Gastrointestinal Oncology which is more correlated to the scope of our review according to your recommendation.

2 We have used language editing services provided by American Journal Experts. So there are some changes in our manuscript after the standard editing. These changes will not influence the content and framework of the paper. And we have provided the language certificate as requested.

3 In the text we cited different data of those literatures in different parts so as to emphasize the results of current researches. As for the table listed in the end of the text, it is used for the general comparison and final summary among the different studies of different time. If you think it is necessary, we will delete the table in the text in order to avoid the repeat of the data.

We would like to express our great appreciation to you for comments on our paper.

Thank you and best regards.

Yours sincerely,
Yu Wang
