

Informed Consent Form

Research background

Your case will be reported by professor Li yong of Guangdong general hospital. This study was approved by the Research Ethics Committee in Guangdong general hospital. This form gives you important information about the study. It describes the purpose, process and method of the study, and please take time to review this information carefully. If you decide to take part in the study, you will be asked to sign this form.

Research purposes

Laparoscopy has been widely used in the treatment of colorectal cancer and has achieved a good radical effect in oncology. However, current clinical association guidelines do not recommend laparoscopic surgery for T4 colorectal cancer.

Research process and methods

We will review the related literatures and summarize them. Otherwise your medical records will be collected, and patient will be followed until now.

Research significance

Your case will help doctors make a treatment. Furthermore, it will provide some information for surgeon.

Privacy policy

Researchers will protect your privacy.

Statement

Taking part in this study is completely voluntary. You do not have to participate if you don't want to. You may also leave the study at any time. If you leave the study before it is finished, there will be no penalty to you, and you will not lose any benefits to which you are otherwise entitled.

Signature

I understand the information printed on this form. My questions so far have been answered. I agree to take part in this study.
