COMMENTS TO AUTHORS

This paper was well written that introduced the current state of DEB-TACE for HCC, including its indications and safety, treatment schedule, usefulness of drug injection, development of DEB-TACE and technical aspects, comparative effectiveness of DEB-TACE and cTACE, latest advancements in the field of transarterial chemoembolization. I think this review is a comprehensive account of TACE in the treatment of HCC, the structure is reasonable and the literature is relatively new. I recommend it to be published.
