BPG Publishing

I would like to indicate that we cannot provide "Approved Grant Application Form(s) or Funding Agency Copy of any Approval Document(s)" as requested because they contain proprietary information include proposals on scientific methods, personal bibliographical information, that are not for public disclosure without legal warrants or other legal justification. Besides, the funding sources for each co-author are under the purview of the corresponding institutional administrators. The grant numbers themselves are searchable online and can be validated through online search.

Sincerely,
