This is to certify that our Vietnam colleagues: Drs. Song-Huy Nguyen-Dinh and Trinh Nhu Nguy provided the data for "The high burden of hepatocellular carcinoma and viral hepatitis in Southern and Central Vietnam: experience of a large tertiary referral center, 2010 to 2016" but that they were not involved in the writing of the manuscript in English. All of the writing was done by US colleagues and those fluent in English, especially Drs. Albert Do, Trang Ngoc Doan Pham, Doan Y Dao, and Moon S. Chen, Jr.

Sincerely,

A handwritten signature in black ink that reads "Moon S. Chen, Jr." in a cursive script.
