The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) I removed the sentence "This review is intended to show the role of ROS in development of Crohn's stricture and the new experimental and clinical evidence supporting oxidative stress as a pathophysiological component of CD" from the introduction because of duplication.

(2) I inserted the objective in the abstract "This review shows in general the concepts of free radicals, lipid peroxide and antioxidant activities and eventually their interferences in the development of Crohn's stricture"

(3) English editing

3 References and typesetting were corrected
