Transcatheter aortic valve replacement in membranous interventricular septum aneurysm with left ventricular outflow tract extension

Banga S *et al.* TAVR in interventricular septum aneurysm

Sandeep Banga, Marco A Barzallo, Casey L Nighswonger, Sudhir Mungee

5 Abstract

We report a challenging case of a 81-year-old male with history of severe calcific aortic valve stenosis and aneurysmal membranous interventricular septum. The presence of anomalies in the sub-annular area can lead to valve malpositioning and its

Transcatheter aortic valve replacement in membranous interventricular septu
