*Retrospective Study*

Preventive fraction of physical fitness on risk factors in cardiac patients:

Retrospective epidemiological study

Caru M *et al.* Preventive fraction of physical fitness

Maxime Caru, Laurence Kern, Marc Bousquet, Daniel Curnier

## Match Overview

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3263535/> ▼

by S Gallanagh - 2011 - Cited by 42 - Related articles

Oct 1, 2011 - 4. **Physical Activity** in Primary **Prevention** of Stroke. Exercise and **physical activity** have a well-established evidence base for their benefits in reducing **cardiovascular risk factors** through the mechanisms described above. Observational **studies** have found an inverse association between **physical activity** and ...

## Physical Fitness and Hypertension in a Population at Risk for ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4338714/> ▼

by SP Juraschek - 2014 - Cited by 36 - Related articles

Dec 17, 2014 - Hypertension is an important **risk factor for cardiovascular** disease and mortality, such that blood pressure reduction has been a major focus of primary **prevention** efforts. Numerous cross-sectional **studies** have described a relationship between reduced **fitness** and blood pressure or hypertension.
