Dear Editor

Thank you very much for the extra constructive comments which help us improve the manuscript. Included is a point by point response to the reviewers' recommendations. The English language is also revised.

PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 37949

Title: New insights of Helicobacter pylori host-pathogen interactions: The triangle of virulence factors, epigenetic modifications and non-coding RNAs

Reviewer's code: 00503406

Reviewer's country: Hungary

Science editor: Xue-Jiao Wang

Date sent for review: 2018-01-15

Date reviewed: 2018-01-16

COMMENTS TO AUTHORS

Comments for ESPS Manuscript NO 37949 This paper is interesting and reasonable. Compared to those similar reviews that have been published previously, however, this paper fails to stand out from the rest. Thus, I could only conclude that this review falls below the Journal's requirements.

Reply: Thanks for your comments. Respectfully, we did our best to wrote the comprehensive review in this regard. As you can see, all of the other reviewers have positive comments on our manuscript.

COMMENTS TO AUTHORS

The article New insights of Helicobacter pylori host-pathogen interactions: The triangle of virulence factors, epigenetic modifications and non-coding RNAs by Vaziri et al is an interesting review on conditions favouring the development of gastric cancer. References seem to be sufficiently updated.

Reply: Thanks for your positive comments.

COMMENTS TO AUTHORS

1. The paper needs language polishing. 2. It should also be emphasized shortly, H. pylori is not only associated with gastric carcinonma, but colorectal cancers (Engin et al. World Journal of Gastroenterology, 2015), as well.

Reply: Thanks for your comments. 1. The English is revised by Native language speaker. 2. The mentioned reference is added to the manuscript.

COMMENTS TO AUTHORS

This is a well-designed and well-written piece of work, because molecular aspects of Helicobacter Pylori infection are rarely presented in the literature. The most interesting part of this article is information concerning cellular signaling and non-coding RNA in etiology of gastric cancer induced by H. Pylori. This review brings useful information for molecular biologists, gastroenterologists and medicine students. Therefore I recommend this article for publication in World Journal of Gastroenterology.
