## COMMENTS TO AUTHORS

Thank you for giving me an opportunity of the review. This is an interesting case report. My questions are as follows. The contrast media of iopromide 370 is originally different from gadoterate meglumine. Did you examine drug-induced lymphocyte stimulation test (DLST) of the contrast agent including iopromide 370 and gadoterate meglumine for this patient? Did this patient have contrast-enhanced computed tomography history and hereditary spherocytosis (HS) history?
