

September 30,2013

Dear Editor,

Please find enclosed the edited manuscript in Word format

**Title: Drainage versus no drainage in secondary peritonitis with sepsis following complicated Appendicitis in adults in the modern era of antibiotics.**

**Author:** Sheraz Ahmed Rather, Shams ul Bari, Asima khan, Ajaz A Malik

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 3817

The manuscript has been improved according to the suggestions of reviewers:

- 1.The clinical findings about the severity of inflamed appendix have been discussed in the result section of the manuscript.
- 2.Title of the tables have been explained
- 3.The discussion part has been shortened
- 4.At least four latest references have been included

Thanks for accepting our work for the journal
