Re: *World Journal of Gastroenterology* submission

To Whom It May Concern:

The purpose of this letter is to certify that Dr. Herwig Cerwenka recently received a professional English language editing service from our company, Write Science Right™, for a paper entitled “Bile Duct Cyst in Adults: Interventional Treatment, Resection, or Transplantation?” (order # 130514-1). All grammatical/syntactical errors and awkward verbiage have been revised to make the paper ready to submit for publication review. The paper was generally well organized as submitted, requiring no deep structural editing. Feel free to contact me if you have any questions.

Best Regards,

A handwritten signature in black ink, appearing to read "Ann EPS", with a long horizontal flourish extending to the right.
