## Basic Study

3

Establishment, functional and genetic characterization of a colon derived large cell  
neuroendocrine carcinoma cell line

Michael Gock,<sup>2</sup> Christina S Mullins, Christine Harnack, Friedrich Prall, Robert Ramer,  
Anja Göder, Oliver H Krämer, Ernst Klar, Michael Linnebacher

## Abstract

## AIM

Gastroenteropancreatic neuroendocrine neoplasms are complex tumors that are

2014年2月14日 - Gaining insights in the biology of large cell NECs is crucial for the identification of potentially therapeutic molecular targets. For this purpose, cell lines derived from tumor tissue specimens provide helpful tools [21]. Although during the last decades a few gastrointestinal NEN cell lines have been established ...
