Diversion colitis and pouchitis: A mini-review

Kentaro Tominaga, Kenya Kamimura, Kazuya Takahashi, Junji Yokoyama,  
Satoshi Yamagiwa, Shuji Terai**Abstract**

Diversion colitis is characterized by inflammation of the mucosa in the defunctioned segment of the colon after colostomy or ileostomy. Similar to diversion colitis, diversion pouchitis is an inflammatory disorder occurring in the ileal pouch, resulting from the exclusion of the fecal stream and a subsequent lack of nutrients from luminal bacteria. Although the vast majority of patients with
