PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 39053

Title: Is it possible to stop nucleos(t)ide analog treatment in chronic hepatitis B patients?

Reviewer's code: 02861252

Reviewer's country: Turkey

Science editor: Ze-Mao Gong

Date sent for review: 2018-04-02

Date reviewed: 2018-04-08

Review time: 6 Days

COMMENTS TO AUTHORS

This is a well written review which analyzed severall aspects of nucleos(t)ide analogue (NA) treatment for chronic hepatitis B (CHB). Due to HCC is the serious complication of CHB, I recommend the authors add some content about NA treatment for HBV-related HCC. 1. Antiviral treatment with NA for HBV-related HCC may reduce the rate of HCC recurrence. (Ann Surg. 2015;261(1):56-66. Ann Surg. 2017;265(4):e46-e47.) 2. Antiviral therapy reduces HCC recurrence in patients with low HBV-DNA level. (PMID:29521740) 3. Rate and risk factors of HCC occurrence after HBsAg seroclearance. (PMID:29624821; PMID:27117732)
