**Between evidence and new perspectives on the current state of the multimodal approach to gastric cancer: is there still a role for radiation therapy?**

Agolli L *et al.* Multimodal approach of gastric cancer

Linda Agolli, Luca Nicosia

### Abstract

In patients affected by gastric cancer, especially those in advanced stage, the multidisciplinary approach of treatment is fundamental to obtain a good disease control and quality of life. Although many chemotherapeutics in combination to radiotherapy are adopted in the peri- or postoperative setting, the most optimal timing, regimens and doses remains controversial. In the era of radical surgery performed with D2-lymphadenectomy, the role of radiation therapy remains to be better defined. Categories of patients, who
