

Dear Sirs,

Thank you for your message.

I enclose the revised version of the above-mentioned manuscript together with a point-by-point reply to reviewers. I have tracked the changes made in the text.

Looking forward to hearing from you,

With kind regards,

Yours sincerely,

Alberto Enrico Maraolo, MD

Name of the Journal: *World Journal of Hepatology (earlier Gastroenterology)*

Manuscript type: MINI-REVIEW (earlier TOPIC HIGHLIGHT)

Title: **Current evidence on the management of hepatitis B in pregnancy**

Running title: HBV in pregnancy.

Alberto Enrico Maraolo, Ivan Gentile, Antonio Riccardo Buonomo, Biagio Pinchera, and Guglielmo Borgia, Section of Infectious Diseases, Department of Clinical Medicine and Surgery, University of Naples Federico II, via Sergio Pansini 5, 80131, Naples, Italy.

1) NUMBER ID 00011431: In this manuscript authors has conducted an in-depth review on the management of hepatitis B in pregnancy. Focuses are not only on the perspective of gravid women but also on the perspective of fetuses and newborns. Basically, the review has included the most recent knowledge on this topic, and is worth publishing in WJG. One minor suggestion: The article is better written by using hierarchical headers or subtitles.

Reply: Many thanks for your kind words. We have added subtitles according to your useful suggestions.

1) NUMBER ID 00011431: *In this manuscript authors has conducted an in-depth review on the management of hepatitis B in pregnancy. Focuses are not only on the perspective of gravid women*

but also on the perspective of foetuses and newborns. Basically, the review has included the most recent knowledge on this topic, and is worth publishing in WJG. One minor suggestion: The article is better written by using hierarchical headers or subtitles.

Reply: Many thanks for your kind words. We have added subtitles according to your useful suggestions.

2) NUMBER ID: 00071703 *Current evidence on the management of hepatitis B in pregnancy. In this review, the authors aimed to highlight the latest insights into the paramount steps in managing HBV in pregnancy, with particular attention to recommendations from recent guidelines and data from up-to-date research syntheses. This manuscript is well written; also the figures are all appropriate. There is only a deficiency in the 2. sentence of Fig-3.*

Reply: Many thanks for your kind words. We have amended the sentence of Figure 3 according to your useful suggestion.

3) NUMBER ID: 02528812 *The review entitled "Current evidence on the management of hepatitis B in pregnancy" is well performed and presented. In this study, the authors have provided the latest developments with respect to management of HBV infection during pregnancy from two perspectives: maternal and neonatal issues. The recommendations in this study are valuable. Over all, I found that the authors provide a high quality of study. The only shortcoming is grammatical errors. The manuscript suffers from several grammar and spelling errors. English style should be revised throughout the manuscript. Thank you.*

Reply: Many thanks for your kind words. We have polished the language throughout the entire manuscript according to your useful suggestion.
