Biomarkers of gastric cancer: Current topics and future perspective

Matsuoka T *et al.* Biomarker of gastric cancer

Tasuku Matsuoka, Masakazu Yashiro

Abstract

Gastric cancer (GC) is one of the most prevalent malignant types in the world and an aggressive disease with a poor 5-year survival. This cancer is biologically and genetically heterogeneous with a poorly understood carcinogenesis at the molecular level. Although the incidence is declining, the outcome of patients with GC remains dismal. Thus, the detection at an early stage utilizing useful screening approaches, selection of an appropriate
