Comment: The quality of X-ray, MRI images is poor. The authors should directly use the images converted from dicom but not photographs taken by a camera.

Response: The X-ray and MRI images (Figure 1,2,7) have been replaced by ones converted from dicom with parameters (Figure 2,7).

Reviewer's code: 00722438

Comment: Very well described clinical case of a rare finding. It deserves to be considered for publication with the Journal.

Response: Thanks for your warm work.

Reviewer's code: 00227683

Comment: The case report presents chronic carpal tunnel syndrome caused by covert tophaceous gout in a 25-year-old male with a family history of tophaceous gout. MRI imaging parameters should be given in Figure 2 and Figure 7. The authors should give an informed consent exemption from the ethics institution.

Response: MRI imaging parameters have been given in Figure 2 and Figure 7. An informed consent exemption has been attached in revision.
