

Name of Journal: World Journal of Orthopedics

Manuscript NO: 39295

Manuscript Type: Systematic Review

Total knee arthroplasty in patients with Paget's disease of bone: A systematic review

Response to reviewers:

- We are grateful for the comments provided by the reviewers.
- Reviewers 1 and 3 appear satisfied with the content of the manuscript.
- In response to the comments made by reviewer 2, we have collated all of the available evidence on this subject area and attempted to highlight the expected outcomes and peri-operative challenges that surgeons face when managing patient with PDB around the knee.
