Institutional Animal Care and Use Committee*

AUA ID: [AUA00004379](#)
AUA Title: Therapeutic Interventions in Murine Polycystic Kidney Disease
PI: William Sweeney Jr
Institution: Medical College of Wisconsin
Species: Mouse

Decision: **Approved**

4/2/2015

Dear Dr. Sweeney Jr ,

The new Animal Use Application (AUA) identified above was reviewed and approved by the Institutional Animal Care and Use Committee (IACUC) on 4/2/2015 . This approval is for a period of three years.

To fulfill the Medical College's obligations under federal regulations, funding commitments, and accreditation principles, post approval monitoring of approved activities will be performed via scheduled or unannounced visits to animal research areas. All Principal Investigators with approved AUAs must participate in this program.

Each year you are required to submit an Annual Renewal (AR) to indicate that you wish to continue research with this AUA. The first AR should be submitted at least 30 days prior to 3/31/2016 to allow sufficient time for processing. You will also be required to submit a 3-Year *de novo* Renewal AUA at least 60 days prior to the deadline to assure prompt and thorough consideration for re-approval.

If you decide to terminate this AUA prior to the expiration of the approval, please do so by clicking the Terminate Study button in the AUA Workspace. At that time, all animals assigned to this AUA must either have been transferred to another approved AUA or other appropriate action must have been taken with respect to such animals.

Please note that if this AUA involves the use of hazardous agents in live animals, a BRC Hazardous Agent Information Sheet must be completed and submitted to the BRC; a hazard communication meeting with the BRC staff will also be required.

This institution has an Animal Welfare Assurance on file with the Office of Laboratory Animal Welfare. The Assurance Number is A3102-01.

Respectfully,

Bryon D. Johnson, PhD, Professor

Chair, IACUC
Department of Pediatrics
Medical College of Wisconsin
