SPECIFIC COMMENTS TO AUTHORS

Good paper, please note that inflammatory response is not simple process, huge number of factors included, so that, focusing in avoiding rejection and minimizing impacts of immune suppression medicines must be the targets of researchers, who should depends

on precise factors to judge the effects.

SPECIFIC COMMENTS TO AUTHORS

The authors have done an excellent and comprehensive review on the recently recognized and not yet clearly definable entity in the field of transplant immunology. The description is clear and highly educational.

Second paragraph. Line 3. Primary and secondary Biliary cirrhosis. You mean primary biliary cholangitis? Page 7. Second paragraph. Line 3. PBC, means primary biliary cholangitis Page 10. The pathogenesis section. At the present form is confuse. I suggest to rewrite this section Page 11. Conclusion section is incomplete. I suggest to rewrite it. Figures 1 and 2 need a better description in the figure legends I suggest do not use the capital letters along the manuscript A list of abbreviations is mandatory The English style must be improve
