### Stepwise evaluation of liver sectors and liver segments by endoscopic ultrasound

Malay Sharma, Piyush Somani, Chittapuram Srinivasan Rameshbabu, Tagore Sunkara, Praveer Rai

#### Abstract

The liver has eight segments which are referred to by numbers or by names. The numbering of the segments is done in an anti-clockwise manner with the liver being viewed from the inferior surface, starting from Segment I (the caudate lobe). Standard anatomical description of the liver segments is available by computed tomographic (CT) scan, and ultrasonography. Endoscopic ultrasound (EUS) has been used for a detailed imaging of many intra-abdominal organs and for the
