SPECIFIC COMMENTS TO AUTHORS

I think it is a very precious lesion and the author 's consideration has been well organized.

SPECIFIC COMMENTS TO AUTHORS

Reviewer comment to Authors This manuscript is the interesting case report. Symptomatic heterotopic gastric mucosa of the rectum is very rare, and you resected by endoscopic submucosal dissection procedure and treated hematochezia. The manuscript

is generally good. However, I would like to ask some questions and comments. Please give your opinion for the suggestions. Minor comments 1: P5 "Other laboratory examinations were normal." I have a comment for the sentence. Is there any anemia? If you check the serum iron or ferritin level, please show us. And is there history of blood transfusion? 2: P6 "Finally, the lesion was resected without bleeding, perforation or other adverse events." It think it is necessary to describe the outcome after the procedure. For example, No hematochezia was seen after resection. No residual lesion was seen 6 month after ESD. Etc. 3: P6 "which was not in accordance with the results of NBI. This may have been due to less focal tissue of pyloric-type gastric mucosa in comparison with fundic-type gastric mucosa in the piecemeal resected lesion, the sampling or cutting site of the histological biopsy." I think this part should be described in discussion. 4: P8 "NBI and NBI-magnifying endoscopy are useful tools for the diagnosis of HGM and can differentiate gastric-type glands from the intestinal mucosa. To our knowledge, this case is also the first report of the use of NBI in HGM of the rectum. NBI clearly showed gastric fundic-type and pyloric-type mucosa lining the rectum and helped us to make a definitive diagnosis." The author emphasized the first case report of rectal HGM that was observed by magnified NBI. I think that you need more explanation in this part. Please make an additional explanation such as how the finding is the characteristic of the fundic mucosa type. 5: P10 "A hemostatic clamp was helpful in treating the remnants of vessels." I think it does not need this sentence, you have already described in the case report.
