**Real practice studies in oncology: A positive perspective**

Alessandro Ottaiano

#### **Abstract**

In the majority of phase III clinical trials, patients are generally excluded on the basis of specific comorbidities, performance status ECOG (Eastern Cooperative Oncology Group) >2, age >65 years, previous malignancies, brain metastases, active infections, psychiatric disorders, non-measurable disease, number and type of previous lines of chemotherapies or biologic therapies. A question raises: Can results of phase III studies be extended to the general population? There is increasing attention to and a resurgence of some terms as
