

August 12<sup>st</sup>, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: ESPS-MsNr4043-edited-REVISION.docx).

**Titel:** Diagnosis and Treatment of Diabetes Mellitus in Chronic Pancreatitis.

**Author:** Nils Ewald, Philip D. Hardt.

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO: 4043** (*ID: 00002970; Topic Highlight; Special Issue, invited by Professor Asbjørn Mohr Drewes*)

The manuscript has now been improved according to the suggestions of the reviewers:

- 1) Since many readers might indeed not be familiar with the term „type 3c diabetes mellitus“, a table (table 1) has been prepared according to the suggestion of reviewer 00503540. The additional table now shows the current classification of diabetes mellitus.
- 2) Unfortunately no clear cut-off line to distinguish between type 2 and type 3c diabetes mellitus can be given in regard to C-peptide and insulin levels. Up to date there is hardly any data on this and it would be very inaccurate to speculate.
- 3) Format has been updated: Reference numbers have been reformatted.
- 4) References were corrected: PMID and DOI have been added where applicable/available.

Thank you for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Nils Ewald, MD, PhD
