SPECIFIC COMMENTS TO AUTHORS

This manuscript presents an extensive literature review of the poorly understood etiology of Legg-Calve-Perthes disease (LCPD), a disease affecting the epiphysis of the femoral head in the pediatric population. Based on the analysis of 64 relevant articles, the authors concluded that there is still a lack of consensus as to the factors affecting

the etiopathogenesis of this disease. The paper is well written and the findings are supplemented with the tabulated details of the major findings and the pertinent references. There are, however, numerous spelling errors which require correction.
