Radiation-associated epithelial-myoepithelial carcinoma among five secondary malignancies: A case report and review of literature

Mohamed H Khattab, Alexander D Sherry, Carolyn G Ahlers, Austin N Kirschner

Abstract

BACKGROUND

Epithelial-myoepithelial carcinoma is a rare, low-grade, malignant tumor that constitutes less than one percent of all salivary gland tumors. To date, only one other case report has described radiation-associated epithelial-myoepithelial carcinoma in the
