SPECIFIC COMMENTS TO AUTHORS

This is a well-written, clear and systematic presentation of a very unusual anatomical variation. I have no comments to authors. Combined with the literature review of similar cases, this is an informative paper.

SPECIFIC COMMENTS TO AUTHORS

This MS describes a Chinese patient with rare clinical condition detected by chance. I understand very rare congenital anomalies consisting of bilateral thoracic kidney and abnormal location of vena cava inferior. However, the MS only focused on such

anomalies without clinical manifestations. Thus, the implication of this MS remains limited. Unfortunately, I don't think it worth for publication as a form of full case report. 1. Instead of full case report, it is suitable for short report such as letter to the editor. 2. It is need to avoid meaningless repeat sentences in the introduction and discussion sections, and the whole volume of the text should be significantly reduced. It is need to rewrite the MS concisely and logically

SPECIFIC COMMENTS TO AUTHORS

In this manuscript, the authors report a rare case of a 55-year-old Chinese male with bilateral thoracic kidneys combined with an anterior IVC. They also review the classification and treatment of these anomalies. This case report is clinically useful.
