**SPECIFIC COMMENTS TO AUTHORS**

This is a good report deserving of publication. The authors should add "lesions" at the end of the first line of the Abstract.

**SPECIFIC COMMENTS TO AUTHORS**

The authors report two patients with Carney complex and reviewed the complex. As Carney complex is a rare disorder, the report is valuable for many physicians. General comments: I hesitate to say this, but, your presentation needs to be amended to be more understandable for readers. Physicians are eager to know clinical images of

diseases. You need to clearly present clinical feature of Carney complex. Showing each frequency of manifestation of Carney complex in table would greatly help readers understand its clinical feature. Table showing features of other syndromes mimicking Carney complex would be valuable. I think you focused on osteochondromyxoma in Carney complex. You need to clearly describe why you focused on osteochondromyxoma in Carney complex. Specific comments: Abstract: You describe that "The prognosis of CNC may thus be improved by early treatment." You need to explain why early treatment for Carney complex is recommended. . Discussion You mention gene analyses of the diseases before descriptions of clinical features of the diseases. I would recommend you mention the clinical features of the diseases before gene analyses. OMX should be spelled out. You need to show the main causes of death in Carney complex. END
