Retrospective Study

Impact of sepsis and non-communicable diseases on prognostic models to predict the outcome of hospitalized chronic liver disease patients

Qazi Arisar¹ FA *et al.* Sepsis and NCDs in cirrhosis

Fakhar Ali Qazi Arisar, Shahab Abid, Preet Ayoub Shaikh, Safia Awan

Abstract

AIM

To evaluate the impact of sepsis and non-communicable diseases (NCDs) on the outcome of decompensated chronic liver disease (CLD) patients.

METHODS

In this cross-sectional study, medical records of patients with CLD admitted to the Gastroenterology unit at the Aga Khan University Hospital were reviewed. Patients
