World Journal of Clinical Oncology

Navi Mumbai, 8th March 2019

Submission of a revised manuscript (Invited case report)

Dear editors,

Many thanks for considering our manuscript for publication in *World Journal of Clinical Oncology*. We have formatted and revised our article according to the reviewer's comments/suggestions and in strict accordance with the Baishideng Publishing Group (BPG) guidelines and requirements for manuscript revision-case report and format for manuscript revision-case report. Here is a point to point response:

INTRODUCTION- We have observed and cited the new WHO 2017 classification for Odontogenic tumors: EL-NAGGAR A.K. et al. WHO Classification of head and neck tumours 4th ed, World Health Organization, 2017.

CASE REPORT- Radiolucent/radiopaque – for CT we have used the terms hypodense/hyperdense.

We have provided information about the patient's follow up, how long was accomplished, if there was any injury, clinical aspect after treatment, presence of recurrence.

DISCUSSION- We have mentioned that the patient's treatment was the same as indicated in the literature.

FIGURES- We have provided and added photomicrographs with better resolution and quality.

We hope that our revised manuscript will be accepted for publication in *World Journal of Clinical Oncology* and look forward to hearing from you.

Yours sincerely,

Dr. Palak Khetan
