

### **Response to the Reviewers:**

- 1) This is an interesting review focusing on cryotherapy in the management of premalignant and malignant conditions of the esophagus, including Barrett esophagus and esophageal adenocarcinoma and squamous cancer. The subject is relatively new and the writing is systematical. Listing for comparison cryotherapy and RFA is suggested.

**Response:** Thank you for your kind comments. A table has been included to compare RFA with cryotherapy.

- 2) This is an interesting review on the role of cryotherapy in esophageal cancer. More information should be detailed in the Table.

Response: Thank you for your kind comments. A new table has been included as per the suggestion.
