The above referenced application is approved by expedited review procedures (45 CFR 46.110, item 4, 5, 6). This approval is valid for a period of one year. The Reviewer conducted a risk-benefit analysis, and determined the study constitutes minimal risk research. The Reviewer determined that this research satisfies the requirements of 45 CFR 46.111.

This study has IRB approval to accrue 100 subjects. The written consent form was reviewed and approved as written.

The Investigator is reminded to contact Legal Contract Administration regarding a Data Use Agreement because this study involves sending a limited data set to an external party.
