SPECIFIC COMMENTS TO AUTHORS

This is the report of 2 cases of neoplastic patients developing AHA. In both cases a successfull controll of the hemorrhage was achieved without by-pass therapy. There is nothing new in these case reports however they signall the relationship between AHA and 2 malignancies not commonly reported in association with AHA

SPECIFIC COMMENTS TO AUTHORS

Well written manuscript reporting interest cases. I would suggest that the authors better explain the mechanisms of Acquired Hemophilia. What is a Acquired Inhibitor? Please explain what is a inhibitor titer against factor VII? Do the authors know what substance is that? If so, please better explain in the INTRODUCTION and DISCUSSION.
