### SPECIFIC COMMENTS TO AUTHORS

The authors conducted a review regarding the management of side effects of TKI treatment in patients with GIST. Although this article is concise and informative, I have a minor suggestion to this article. 1. Because the prevalence of HBV infection is about 10%

in China, the authors should consider the issue of TKI-related HBV reactivation in patients receiving TKI treatment. In addition to the topic of TKI related hepatotoxicity, please add a paragraph discussing this issue.

## SPECIFIC COMMENTS TO AUTHORS

Dear Authors, I read your manuscript namely "Chinese consensus of management of tyrosine kinase inhibitor-associated side effects in gastrointestinal stromal tumor". Side effects and its management of the TKI treatment in the patients with GIST were

reviewed. Overall it is a globally good presented study with an interesting topic. Title, abstract and keywords are well described and clear. Conclusions are justifiable and prudent enough. But in the methods it has some major deficiencies. In the text, it was said that this manuscript is consensus guidelines and results from expert panel discussion. But in the text, the strenght and quality of the evidences and recommendations were not mensioned. Did GRADE system be used in the study (necessery for guidelines). in this situation, this manuscript is a only review.

### SPECIFIC COMMENTS TO AUTHORS

This is a very useful guideline , providing evidence- and experience-based expert recommendations on the management of TKI-associated side effects in GIST patients. Your abstract summarize and reflect the the main body of the manuscript.
