**Necroptosis in inflammatory bowel disease and other intestinal diseases**

Li S et al. Necroptosis in IBD

Sha Li, Long-Gui Ning, Xin-He Lou, Guo-Qiang Xu

## Abstract

For a long time, it was believed that apoptosis and necrosis were the main pathways

跳到 Apoptosis and Intestinal Inflammation - A dysregulated apoptosis has also been suggested to play a role in the pathogenesis of human inflammatory bowel disease (IBD), including Crohn's disease (CD) and ulcerative colitis (UC). It was reported that an excessive cell shedding and barrier loss in IBD patients in remission predict a disease relapse [58].
