SPECIFIC COMMENTS TO AUTHORS

This article entitled "Novel Report of Variant Late Infantile Ceroid Lipofuscinosis in Jordan" by Omar Nafi et al is interesting in its field. The authors provide a case study of a variant late infantile neuronal ceroid lipofuscinosis and identifying genetic causes of the neurodegenerative disorders. This article is well written with few typos inside. Here

are some comments : 1. The author mentioned a word 'novel' for the case. Please provide the reasonable statement about it and show the different with other cases of late infantile NCL. 2. If we are talking about diagnosis of a case then we shall also think about the possible differential diagnosis therefore the authors should provide a schematic procedure to exclude all other possible diagnosis. 3. The clinical data (image without identity), the laboratory and MRI results (the images) should be provided
